

November 3, 2025

On Monday, January 19<sup>th</sup>, 2026, Southeastern Freight Lines will implement changes to our Tracing feature that will require a MySEFL login for visibility of full tracing details. Basic tracing information will remain available for customers that do not credential through MySEFL.\*

This change will affect the following Tracing platforms:

- SEFL external website ([www.sefl.com](http://www.sefl.com))
- SEFL mobile website
- SEFL mobile app
- Web Connect / API

Customers without a current MySEFL login who utilize SEFL's website to trace shipments may desire to request a MySEFL login by clicking [Here](#). *A reminder that MySEFL logins are for customers that have existing SEFL accounts with established pricing.*

Customers utilizing API Tracing should update their Transportation Management System (TMS) according to the instructions listed on our Web Connect Services page contained [Here](#). *Note that only a MySEFL username and password are required in the API feed, not a SEFL account number.*

**While the implementation date is in January 2026, customers are encouraged to make internal changes ahead of this date.**

Thanks for your attention to this important security enhancement, which will align us with the current industry standard and further protect SEFL and our customers' information.

Should you have any questions, please contact your Account Manager.

**Southeastern Freight Lines**
