

Puerto Rico Service Center Update

Our Puerto Rico service center is open but with very limited operations. Many of our commercial customers are closed and the island's infrastructure and utilities including power, communications, and water is nonexistent or very limited. Our emphasis will be to move shipments that consist of necessary supplies and equipment that will assist Puerto Rico and its people in their recovery. In order to make delivery of a shipment, we need a working cellphone number for a contact in Puerto Rico. At this time we cannot promise our standard transit times or any service commitments.

Thank you.
