

# DEPENDABLE SERVICE to the

## US Virgin Islands

**SOUTHEASTERN FREIGHT LINES**

**Southeastern has served the US Virgin Islands with dependable vessel service since 2007.**

### SCHEDULE:

Vessel sails every Friday  
 First stop is St. Thomas on Saturday morning  
 Second stop is St. Croix on Saturday evening  
 Freight for both islands is available Monday morning

**Documentation to the US Virgin Islands is very similar to that of Puerto Rico. Shippers should provide Southeastern with the following:**

**Shipper Bill of Lading** – This must include the shipments “Country of Origin” i.e.; China, Canada, etc.

**Commercial Invoice** – This is needed by Tropical Shipping, since shipments arriving in the USVI must be cleared through the US Customs Service and local excise taxes paid prior to release to the importer. Tax clearance is the responsibility of the importer, so the shipper should not be concerned or involved in this process.

**Written Letter of Authorization** - Like Puerto Rico, Southeastern will complete a Shippers Export Declaration online and submit to the Department of Treasury via AES Direct. If a Shipper wants us to provide this service, they will need to complete this form which is currently available on our website. If the shipper has already completed this authorization for their Puerto Rico shipments it will not be necessary for them to do this again. We will already have it on file in our Jacksonville office.

Please insure your shippers send the proper documentation. This will save us time and money and most importantly will not result in a delay for our customer!
